DETAILED ACTION

Priority

Applicant's priority claim to US Application No. 10/172,391 (US Patent No. US 6,711,460 B1) filed March 19, 2004 and US Provisional Application 60/299,116 filed June 18, 2001 are hereby acknowledged.

The terminal disclaimer filed on June 26, 2009 has been approved and entered.

Allowable Subject Matter

Claims 1 and 31-77 are allowed.

The following is an examiner's statement of reasons for allowance:

The statement of allowance is in reference to independent claim 1. All other claims are dependent on claim 1.

The present application is directed to an apparatus for delivering prescription drugs. Independent claim 1 recites the unique elements of "a prescription input device [* * *] at a location" and "a pharmacist terminal remote from the location" in combination with the other claim elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Discussion of the most relevant prior art

The following references have been identified as the most relevant prior art to the claimed invention.

(i) US Patent No. US 6,711,460 B1 to Reese. The claimed invention is a divisional application of US Application No. 10/172,391 (US Patent No. US 6,711,460 B1) and the applicant has filed a terminal disclaimer with respect to this patent.

(ii) European Patent Application EP 1226806 A2 to Liff. Liff discloses an automated drug dispensing system which includes a cabinet adapted to store a variety of prepackaged pharmaceuticals. However, Liff does not teach or suggest the elements of "a prescription input device [* * *] at a location" and "a pharmacist terminal remote from the location".

(iii) "Robots in Health Care Drawing Rave Reviews at Area Hospitals.", Jeff Bell, *Business First*, Columbus, October 27, 2000, Vol. 17, Issue 9; p. A3 (Bell). Bell discloses using a robot to fill prescription bins at a hospital pharmacy. However, Bell does not teach or suggest the elements of "a prescription input device [* * *] at a location" and "a pharmacist terminal remote from the location".
